

## Lab 3

Q 1.

⇒ use college,

~~college.create~~

(i) db.createCollection("student")

(ii) db.student.insert({\_id: 1, RollNo: 5, Age: 15,  
contactNo: 90865432, email-id: "ram@gmail.com"})

⋮

(Inserting records)

(iii) update:

db.student.update({RollNo: 10}, { \$set:  
{email-id: "rahul3@gmail.com"} }, {upsert: true});

(iv) Replace "ABC" to "FEM" of Rollno 11:

db.student.update({RollNo: 11, studName: "ABC"},  
{ \$set: {studName: "FEM"} }, {upsert: true});

(v) Export:

> mongodump --collection <sup>college</sup>student --collection student  
--type=csv --out student.~~json~~csv

(vi) Import Drop table

db.student.drop()

(vi) Import

```
> mongoimport --db college --collection student  
--type=csv --student.csv
```
