Q.2.

=> use accounts

(i) db. create Collection ("customers")

(ii) Insert :

db. creat
db. customer. insert ({ cust_id : 1 , Acc-Bal : 4000,
                                    Acc-Type : "z" })

db. customer. insert ({ cust-id : 2, Acc_Bal : 1100,
                                    Acc-Type : "A" })

                        :
                        :

                (Insert records)

(iii) db. customer. find ({ Acc-Bal = { $gt : 1200 },
                        Acc-Type : "z" })

(iv)   Maximum & Minimum :

```
db. customer . aggregate ( [

        { $group : { _id : "$cust_id",
                min_bal : { $min : "$Acc_Bal" },
                max_bal : { $max : "$Acc_Bal" }
            }
        }
    ])
```

(v)   Export :

```
> mongoexport --db accounts --collection customer
    --type = csv --out  c:\ account.csv
    --fields cust_id, Acc_Bal, Acc_Type
```

(vi)   db. customer . drop ()

(vii)   Import :

```
> mongoimport --db accounts -- collection customer
    --type = csv  -- file customer.csv
```
